Bordeaux

## MY EXPERIENCE IN SCIENCES PO BORDEAUX

*Choosing Sciences Po Bordeaux for my students exchange was the best decision of my studies. It was an amazing experience both academically and socially. The European projects department were very nice and always willing to help. Before my arrival, they gave me a*

*very good recommendation for accommodation, during my stay they helped me to choose the best academic courses for me. They also helped me with bureaucracy difficulties and were supportive in general.*

*The stay here began with an amazing introduction week, in which we traveled around Bordeaux, studied French every day and received all the important information regarding our stay here. This week helped me make new friends easily and integrate in the university successfully, so as in France in general.*

*The university has very good facilities. The library is a very good place to study. There are many different associations of the university that also gives the opportunity to know French students. I joined the soccer team and made many friends there. There are many 'Crous' restaurants around the university which has food at low prices for students.*

*I would recommend anyone coming here and studying in Sciences Po Bordeaux.*

*Sincerely,*

Bar Ziv.
