Economic challenges in Africa

j.p.berrou

Presentation

This course aims to provide third year students in Sciences Po Bordeaux with insight on economic analysis and economic issues related to African countries. The course is organized around six contemporary economic issues, and proposes three analytical steps to help the students understand those issues: (i) analysis of facts (definitions and measures); (ii) a critical examination from a theoretical perspective (comparison of the various arguments of economists); (iii) the implications in terms of economic policies. The six issues represented in the form of questions are as follows: Is Afro-optimism relevant today? Is the African continent the leader... in matters of inequality? Family agriculture vs. agribusiness: what agricultural future is in store for African countries? Industrialization and structural transformations: are African economies victims of the resource curse? Labour markets in Africa: is the informal sector an obstacle or a lever for development? Towards a return of sovereign debt crises in Africa?

Recommended Prerequisite(s)

A good knowledge of the fundamentals of economics (see first-year course of general economics, first-year course of micro-economics, and third-year course of macroeconomics).

In brief

ECTS credits : 2.0
Number of hours : 18.0
Teaching term : Six-monthly
Teaching activity : Lecture course
Year : Third year
Validation : Final written examination

Bibliography

Bibliographie indicative transversale (pour chaque séance une bibliographie spécifique sera également proposée).

* Hugon (Philippe), Économie de l’Afrique, Repères n°117, La Découverte, 6e Ed, 2013.

Formule pédagogique

Each issue will be addressed in two sessions (2x 90 min). The sessions will be divided into different phases: one will consist in a classic lecture delivered by the lecturer, a phase of collective discussion and reflection based on texts that must be read prior to the session (extracts from articles, chapters of books or reports of international institutions) and/or statistical data (graphs, tables) and video viewing. Quizzes may be administered to ensure that the course is well understood during the session.
