

History of economic thought

Presentation

The objective of this course is to study the history of economic thought, from the era of the Greek philosophers to today, by highlighting the continuity in economic thought, analysis and economic action within the main systems of political economy. The course will begin by examining the various systems of political economy (SEP) and the first SEP (the physiocratic system: 1758-1776), and will then proceed to study the classics (English pessimism: 1776-1848), criticism of classical political economy (Karl Marx, Engels and Marxism), marginalist revolution (the emergence of neoclassical economics as the dominant economic paradigm: 1871-), the last SEP (John Maynard Keynes' revolution: 1936-), and finally contemporary syntheses (since 1945) of the various political economy systems.

In brief

Number of hours : 18.0
Teaching term : Six-monthly
Teaching activity : Lecture course
Year : First year
Validation : Final written examination
