Introduction to environmental politics: ideas and policies

n.berny

Descriptif

This course aims at depicting how contemporary societies have tackled environmental problems. It will address the first policy developments which paved the way for key principles and areas in environmental legislations as well as in international negotiations. A focus on actors and ideas will complete this perspective, thus showing the forces shaping environmental politics.

Pré-requis souhaités

Basic knowledge in sociology and political science (social action, collective action, public policies, international relations).
