

CSR communication

Presentation

How does one design, formalize and manage a territorial strategy for sustainable development in the framework of cooperation between multiple parties? How can citizens be given a new role at each stage of the process, and how does one develop a new territorial intelligence for the general interest and for preserving the common good?

Understanding global challenges (SDG) and the local benefits of a territorial approach to sustainable development.

Understanding each stage of implementation of a territorial CSR project through the example of the Communauté de Communes des Vallées du Haut-Anjou (Federation of municipalities of the Haut-Anjou Valleys), the first federation of municipalities with the Lucie 26000 Collectivités label.

Laying the foundations of an engaging communication strategy involving local stakeholders (including businesses): informing, consulting, debating, and co-constructing a multi-party sustainable project.

Case study: Great debate "Nantes, the Loire River and Us", design, management, and communication on the closing session of the public consultation event.

Recommended Prerequisite(s)

Students must have good knowledge of CSR and of the key stages of sustainable development nationally and internationally.

Understanding the rationales of actors that promote local dynamics.

In brief

Number of hours : 12.0

Teaching term : Six-monthly

Teaching activity : Seminar

Year : Fifth year

Validation : Continuous assessment
