

Mapping of political and institutional actors

Presentation

This methodological seminar is intended to support students conducting *Country Risk* and *Territorial and Sectoral Diagnostic* studies. It has several objectives: Train students to identify the different actors in the political and institutional arenas, to situate them within the political system, to identify the factors of instability and political, social and institutional tensions in the countries of the South, to identify the actors and resources thereof; to use analytical tools and frameworks of political sociology in order to be able to construct diagnoses; to develop multi-scalar, multi-temporal, systemic and interactionist analytical tools; to prepare the *Country Risk assessment* and the contextual analysis of the project, and to promote the development of original and specific tools.

In brief

ECTS credits : 3.0

Number of hours : 18.0

Teaching term : Six-monthly

Teaching activity : Seminar

Year : Fourth year

Validation : Continuous assessment

Formule pédagogique

This class places emphasis on the methodology and the implementation of the methodology. It alternates sessions of presentations by the teacher of the thematic issues, analytical frameworks, and of the main categories of actors, with sessions of presentations by groups of students. Week after week, students will gather the materials that will enable them to conduct their Country Risk or Sectoral and Territorial Diagnostic studies and build their mappings and tools for deciphering political, institutional, and social situations.
